

Giganplast, azienda italiana leader nello stampaggio di materie plastiche, è un punto di riferimento nella produzione di articoli per alimentare, ristorazione, catering, pulizia e raccolta differenziata.

Da sempre guidata da qualità e affidabilità, offre soluzioni pratiche e durevoli per i professionisti del settore.

Nel 2025 l'acquisizione da parte di Stefanplast segna un passaggio strategico: l'integrazione tra l'esperienza Ho.Re.Ca. di Giganplast e la struttura produttiva di Stefanplast permette di ampliare i mercati e rafforzare la presenza internazionale, valorizzando importanti sinergie industriali.

*“Oggi si apre un nuovo capitolo nella nostra storia: l'unione delle due aziende sviluppa importanti prospettive di crescita, permettendoci di continuare a creare prodotti che coniughino utilità e bellezza, sempre al servizio delle persone e del loro lavoro.”*

Giganplast is a leading Italian manufacturer specializing in plastic injection molding, recognized as a key reference point in the production of items for the foodservice, hospitality, catering, cleaning, and waste sorting sectors.

With a long-standing focus on quality and reliability, the company provides practical, durable solutions tailored to the needs of industry professionals.

In 2025, the strategic acquisition by Stefanplast marked a new phase of growth. The integration of Giganplast's expertise in the Ho.Re.Ca. sector with Stefanplast's industrial capabilities has made it possible to expand into new markets and strengthen the brand's international presence, maximizing valuable industrial synergies.

*“A new chapter in our story begins today: the merger of our two companies opens the door to new growth opportunities, allowing us to continue creating products that combine functionality and aesthetics — always serving people and their work.”*

# Giganplast: Qualità, Sicurezza e Ambiente

## Giganplast: Quality, Safety and Environment

### Qualità e sicurezza alimentare

Giganplast rispetta tutte le normative europee sui materiali e oggetti destinati a venire a contatto con alimenti, tra cui i Regolamenti (CE) 1935/2004, 10/2011 e 1907/2006 (REACH). Tutti i nostri materiali destinati all'uso alimentare sono sottoposti a test di migrazione eseguiti da laboratori accreditati, per garantire la sicurezza durante tutte le fasi di utilizzo: ricezione, lavorazione, conservazione e servizio.

**I materiali impiegati, sono privi di bisfenolo A (BPA) e completamente riciclabili.**

### Produzione e origine

Tutti i prodotti Giganplast sono realizzati interamente in Italia, con processi industriali controllati e tracciabili, nel rispetto degli standard qualitativi più elevati.

### Igiene e design

I nostri articoli sono progettati per favorire la pulizia e ridurre i rischi di contaminazione. Le superfici lisce, i bordi arrotondati e l'assenza di spigoli facilitano le operazioni di igienizzazione, secondo i principi del sistema HACCP (Analisi dei Pericoli e Punti Critici di Controllo).

### Tracciabilità

Giganplast garantisce la tracciabilità dei propri prodotti lungo tutta la catena di fornitura, dal materiale di partenza fino al cliente finale, in conformità ai Regolamenti (CE) 852/2004 e 178/2002.

### Personalizzazione e colori

Su determinati articoli è possibile richiedere la personalizzazione con marchio impresso a caldo. È inoltre possibile realizzare colorazioni personalizzate, sviluppate su richiesta e gestite tramite lotti produttivi dedicati.

### Quality and Food Safety

Giganplast complies with all European regulations concerning materials and articles intended to come into contact with food, including Regulations (EC) 1935/2004, 10/2011, and 1907/2006 (REACH). All our food-contact items undergo migration testing carried out by accredited laboratories to ensure safety throughout every stage of use: receiving, handling, storage, and service.

**The materials used are free from bisphenol A (BPA) and fully recyclable.**

### Manufacturing and Origin

All Giganplast products are manufactured entirely in Italy through controlled and traceable industrial processes, in compliance with the highest quality standards.

### Hygiene and Design

Our products are designed to facilitate cleaning and minimize contamination risks. Smooth surfaces, rounded edges, and the absence of sharp corners ensure ease of sanitation, in line with the principles of the HACCP system (Hazard Analysis and Critical Control Points).

### Traceability

Giganplast ensures full traceability of its products throughout the entire supply chain—from raw materials to the end user—complying with Regulations (EC) 852/2004 and 178/2002.

### Customization and Colors

Selected items can be customized with hot-stamped branding upon request. Customized colors are also available, developed on request and managed through dedicated production batches.

### Giganplast è certificata:

**UNI EN ISO 9001:2015** – Sistema di gestione per la qualità.

**UNI EN ISO 14001:2015** – Sistema di gestione ambientale.

**UNI EN ISO 45001:2018** – Sistema di gestione della salute e sicurezza sul lavoro.

Art. PSV28HD3 è certificato:

**Plastica Seconda Vita (PSV)** – Certificazione di plastica rigenerata di seconda vita.

**TÜV EN 840-1-5-6:2020** – Normativa europea per contenitori mobili per rifiuti.

Art. 2800HD3 è certificato:

**TÜV EN 840-1-5-6:2020** – Normativa europea per contenitori mobili per rifiuti.

### Giganplast is certified for:

**UNI EN ISO 9001:2015** – Quality Management System.

**UNI EN ISO 14001:2015** – Environmental Management System.

**UNI EN ISO 45001:2018** – Occupational Health and Safety Management System.

Art. PSV28HD3 is certified for:

**Second Life Plastic (PSV)** – Certification for regenerated second-life plastic.

**TÜV EN 840-1-5-6:2020** – European standard for mobile waste containers.

Art. 2800HD3 is certified for:

**TÜV EN 840-1-5-6:2020** – European standard for mobile waste containers.

## Giganplast e la responsabilità ambientale

### Giganplast and environmental responsibility

#### Giganplast e l'impegno per l'ambiente

Giganplast S.r.l. considera la sostenibilità ambientale un pilastro strategico della propria attività. Per questo ha adottato un Sistema di Gestione Ambientale conforme alla norma UNI EN ISO 14001, impegnandosi a ridurre l'impatto delle proprie attività e a promuovere una cultura aziendale attenta all'ambiente.

#### Impegni ambientali dell'Azienda

Gli obiettivi ambientali dell'azienda si concretizzano attraverso azioni mirate:

Tutela del territorio in cui l'azienda opera, attraverso la prevenzione dell'inquinamento e la gestione responsabile dei processi produttivi.

Diffusione della Politica Ambientale a tutti gli stakeholder, interni ed esterni, rendendo chiaro l'impegno dell'azienda verso una crescita sostenibile.

Monitoraggio e miglioramento continuo degli impatti ambientali significativi, attraverso sistemi di controllo, analisi e aggiornamento costante.

Coinvolgimento attivo del personale nella gestione ambientale quotidiana, promuovendo comportamenti virtuosi e pratiche operative a basso impatto.

#### Azioni concrete e misurabili

L'impegno di Giganplast si traduce in azioni concrete e misurabili:

Utilizzo esclusivo di materiale plastico di prima scelta, con recupero e reimpiego interno degli scarti di produzione tramite impianti dedicati, per dare vita a nuovi articoli e contenitori in plastica riciclata.

Prevenzione di sversamenti accidentali e riciclo degli imballaggi cartacei in collaborazione con operatori specializzati del settore ambientale.

Conversione degli impianti di riscaldamento dal gasolio al metano già nel 2004, per ridurre le emissioni inquinanti.

3.000 m<sup>2</sup> di tetti fotovoltaici, per una produzione di energia pari a 420 kWp e un risparmio annuo di oltre 200.000 kg di CO<sub>2</sub>.

#### Il progetto Infinitylife e l'economia circolare

In linea con i principi dell'economia circolare e della regola delle 3R (Riduci, Riutilizza, Ricicla), Giganplast ha sviluppato il progetto Infinitylife, che trasforma gli scarti in nuove risorse.

L'esempio concreto è il contenitore da 120 litri certificato PSV (Plastica Seconda Vita) dall'Istituto Italiano dei Plastici: realizzato con fino al 50% di plastica rigenerata internamente, mantiene gli stessi standard qualitativi e prestazionali del materiale vergine.

#### Il ruolo dei collaboratori

Ogni collaboratore è parte attiva nel percorso di sostenibilità: tutte le mansioni sono svolte nel rispetto delle procedure ambientali aziendali, con la possibilità di proporre idee e soluzioni per migliorare ulteriormente le performance ambientali.

#### Giganplast and its commitment to the environment

Giganplast S.r.l. considers environmental sustainability a strategic pillar of its business. For this reason, it has adopted an Environmental Management System compliant with UNI EN ISO 14001, committing to reduce the impact of its activities and to promote a corporate culture focused on environmental awareness.

#### The Company's environmental commitments

The company's environmental objectives are implemented through specific actions:

Protection of the local area where the company operates, through pollution prevention and responsible management of production processes.

Dissemination of the Environmental Policy to all stakeholders, both internal and external, making the company's commitment to sustainable growth clear.

Monitoring and continuous improvement of significant environmental impacts, through constant control systems, analysis, and updates.

Active involvement of staff in daily environmental management, promoting virtuous behaviors and low-impact operating practices.

#### Concrete and measurable actions

Giganplast's commitment translates into concrete and measurable actions:

Exclusive use of first-choice plastic material, with recovery and internal reuse of production waste through dedicated systems, to create new articles and containers from recycled plastic.

Prevention of accidental spills and recycling of paper packaging in collaboration with specialized environmental operators.

Conversion of heating systems from diesel to methane as early as 2004, to reduce polluting emissions.

3,000 m<sup>2</sup> of photovoltaic roofs, producing 420 kWp of energy and saving over 200,000 kg of CO<sub>2</sub> annually.

#### The Infinitylife project and the circular economy

In line with the principles of the circular economy and the 3R rule (Reduce, Reuse, Recycle), Giganplast has developed the Infinitylife project, which transforms waste into new resources.

A concrete example is the 120-liter container certified PSV (Second Life Plastic) by the Italian Plastics Institute: made with up to 50% internally regenerated plastic, it maintains the same quality and performance standards as virgin material.

#### The role of employees

Every employee plays an active role in the sustainability journey: all tasks are carried out in compliance with the company's environmental procedures, with the opportunity to propose ideas and solutions to further improve environmental performance.

## Soluzioni di contenimento e trasporto per il settore alimentare e Ho.Re.Ca. Storage and transport solutions for food industry and Ho.Re.Ca.

**Nella ristorazione moderna, la qualità del servizio nasce dalla corretta gestione degli alimenti. Scegliere strumenti adeguati per la conservazione e la preparazione significa garantire igiene, sicurezza e freschezza, riducendo al minimo sprechi e deterioramento.**

Una conservazione ben organizzata permette di preservare le proprietà organolettiche, rispettare le normative HACCP e mantenere ordine e continuità nel lavoro quotidiano, soprattutto quando si tratta di alimenti proteici che richiedono particolare attenzione.

Per rispondere a queste esigenze, Giganplast offre una gamma completa di soluzioni pensate per la cucina professionale: contenitori e cassette di diverse dimensioni, impilabili e facili da igienizzare, ideali per stoccaggio e trasporto; caraffe graduate che assicurano precisione nelle dosi; contenitori da frigo con coperchio, studiati per proteggere gli alimenti da contaminazioni incrociate e conservare al meglio freschezza e qualità.

Realizzati con materiali resistenti e progettati con un design funzionale ed ergonomico, questi strumenti sono concepiti per durare e semplificare il lavoro.

Grazie a spazi dedicati alle etichette, la tracciabilità delle scorte diventa immediata e sicura, contribuendo a un'organizzazione più efficiente e a una cucina sempre performante.

**In modern catering, the quality of service begins with proper food management. Choosing the right tools for storage and preparation means ensuring hygiene, safety, and freshness, while minimizing waste and spoilage.**

Well-organized storage makes it possible to preserve organoleptic properties, comply with HACCP standards, and maintain order and continuity in daily operations-especially when it comes to protein-rich foods that require particular attention.

To meet these needs, Giganplast offers a complete range of solutions designed for professional kitchens: containers and crates of different sizes, stackable and easy to sanitize, ideal for storage and transport; graduated jugs that ensure precise dosing; refrigerator containers with lids, designed to protect food from cross-contamination and preserve freshness and quality.

Made from durable materials and designed with functional and ergonomic features, these tools are built to last and to simplify work.

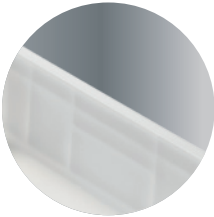

Thanks to dedicated label spaces, stock traceability becomes immediate and secure, contributing to more efficient organization and consistently high-performing kitchens.

## Prodotti professionali per l'esposizione e il servizio

### Professional products for display and food serving

**Giganplast offre una gamma completa di accessori per la presentazione, la conservazione e il servizio degli alimenti, con particolare attenzione alla praticità, all'igiene e alla qualità dei materiali.**

Le soluzioni sono pensate per rispondere alle esigenze di cucine professionali, ristoranti, mense, self-service, hotel, bed & breakfast, strutture sanitarie e collettività in generale.

Vassoi resistenti e maneggevoli, disponibili in diversi formati e finiture, ideali per buffet, linee self e banchi espositivi. Vetrinette rettangolari, portatorte, caraffe, ciotole e mestoli in plastica trasparente ad alta qualità, progettati per proteggere gli alimenti e valorizzarne la presentazione. Piatti, bicchieri e posate riutilizzabili, una proposta versatile e funzionale, adatta a diversi contesti di consumo collettivo e occasioni informali.

L'ampia selezione di prodotti Giganplast unisce funzionalità, resistenza e design professionale, offrendo soluzioni pratiche e affidabili per ogni esigenza di servizio.

**Giganplast offers a complete range of accessories for food presentation, storage, and service, with particular attention to practicality, hygiene, and material quality.**

The solutions are designed to meet the needs of professional kitchens, restaurants, canteens, self-service facilities, hotels, bed & breakfasts, healthcare institutions, and collective catering environments.

Durable and manageable trays, available in different sizes and finishes, are ideal for buffets, self-service lines, and display counters. High-quality transparent plastic display cases, cake stands, jugs, bowls, and ladles are designed to protect food while enhancing its presentation. Reusable plates, glasses, and cutlery provide a versatile and functional option suitable for various collective dining contexts and informal occasions.

The wide selection of Giganplast products combines functionality, durability, and professional design, offering practical and reliable solutions for every service need.

## Contenitori per la raccolta differenziata e per l'igiene in ambienti professionali

### Containers for waste sorting and hygiene in professional settings

**Giganplast propone una linea completa di articoli progettati per rispondere alle esigenze dei contesti professionali più rigorosi, con soluzioni versatili adatte a cucine industriali, strutture sanitarie, spazi di servizio e ambienti collettivi.**

Le pattumiere Giganplast, disponibili in diversi formati consentono una raccolta differenziata efficace. La struttura solida e i materiali facilmente lavabili garantiscono durata e praticità di manutenzione,

mentre il sistema di apertura a pedale assicura un utilizzo igienico senza contatto diretto, riducendo i rischi di contaminazione. Queste caratteristiche le rendono ideali anche per ambienti temporanei o non attrezzati.

La gamma comprende inoltre sgabelli ergonomici, contenitori per biancheria e accessori per le attività di lavanderia e pulizia. Ogni prodotto è studiato per ottimizzare i flussi di lavoro e mantenere elevati standard di igiene in ogni fase operativa.

Realizzati in materiali resistenti e durevoli, capaci di sopportare l'uso quotidiano e gli agenti chimici, i prodotti Giganplast uniscono design funzionale, solidità e facilità di sanificazione. Sono la scelta affidabile per chi lavora in contesti dove la sicurezza e l'igiene incrociata sono prioritarie. Per strutture sanitarie e assistenziali, Giganplast propone dispositivi mobili per l'igiene personale e soluzioni integrate per i bagni. Prodotti pratici, facilmente trasportabili e utilizzabili in diversi ambienti.

**Giganplast offers a complete line of items designed to meet the needs of the most demanding professional settings, with versatile solutions suitable for industrial kitchens, healthcare facilities, service areas, and collective environments.**

Giganplast bins, available in different sizes, allow for effective waste sorting. Their solid structure and easy-to-clean materials ensure durability and convenient maintenance,

while the pedal-operated opening system guarantees hygienic, hands-free use, reducing contamination risks. These features make them ideal even for temporary or non-equipped environments.

The range also includes ergonomic stools, laundry containers, and accessories for cleaning and laundry activities. Each product is designed to optimize workflow and maintain high hygiene standards at every operational stage.

Made from strong, durable materials capable of withstanding daily use and chemical agents, Giganplast products combine functional design, sturdiness, and easy sanitization. They are the reliable choice for those working in contexts where safety and cross-contamination prevention are priorities. For healthcare and care facilities, Giganplast also offers mobile hygiene devices and integrated bathroom solutions—practical products that are easy to transport and use in different environments.

# Informazioni generali

## General information

- Tutti i nostri prodotti non contengono “bisfenolo A”.
  - Tutti i nostri prodotti destinati a contenere o venire in contatto con alimenti, sono stati sottoposti a test di migrazione da laboratori accreditati.
  - Tutti i nostri prodotti sono fabbricati in Italia.
  - Personalizzazioni a richiesta sono possibili con marchio impresso a caldo su determinati prodotti.
  - Colori a richiesta possono essere prodotti con un quantitativo minimo dedicato.
- All our products are free from Bisphenol A (BPA).
  - All our food-contact products have been tested for migration by accredited laboratories.
  - All our products are manufactured in Italy.
  - Customizations upon request are available with hot-stamped branding on selected products.
  - Colour customizations can be produced upon request, with a dedicated minimum order.

### Materia prima – comportamento nelle diverse situazioni climatiche

### Raw materials – behaviour in several climatic situations

|  |                           | minimum temperature | maximum temperature |
|--|---------------------------|---------------------|---------------------|
|  | Polypropylene             | - 15° C             | + 80° C             |
